Body Type
Tillage & Seeding

Stock No.
DIG3

The DIGGER is designed for deep loosening of the soil at a depth of 300-500mm as well as mixing of soil and plant residue. Shanks are fitted over two rows but in extreme cases can be used a single row for reduced traction resistance. A set of leveling discs behind the shanks help incorporate plant residue and a rear roller leaves a nice, level finish….. ALL IN ONE…
